

Our debt → interest → inflation system hurts everyone:
rich and poor, people and planet.

- In the UK, do you know that in this year's budget, per person
- our national debt amounts to £7729?
 - annual interest payments come to £423?
 - Public Spending Borrowing Requirement (PSBR) is £39?

Do you know that the Government could wipe out its debt
by issuing interest-free notes and coins?

Our Campaigning Materials

Poems and Sample Letters on Money Supply to
Potential Allies, MPs, MEPs, Local Councillors, Lords and Bankers

Your Response

To become a *Campaign Supporter*, please contact us
to discuss how we can help each other.

Canon Peter Challen (0171) 207 0509
John Courtneidge (01992) 501 854
Sabine McNeill (0171) 328 3701

We encourage you to support the Campaign in any way,
possibly by direct debit to the Campaign account:

The Co-operative Bank
Sorting Code: 08-92-50 Account: 500 10008

We have started the work without funding and are looking for
support, commitment and dedication on any level.

A Canadian journalist estimated that only **one in a thousand**
people understands how money is made.

Join us in changing that percentage!

CAMPAIGN for INTEREST-FREE MONEY

To Advocate Financial Tools for Exchange
Free from Debt, Interest and Inflation

Global Café
15 Golden Square • London W1R 3AG
Tel (0171) 328 3701 • sabine@globalnet.co.uk

**Why Interest-Free? Because interest payments
on debts create unsustainable economics.**

Our Mission

The Campaign for Interest-Free Money has been set up to

- ♦ **raise awareness** of the problems and the opportunities
that surround money as the instrument for human exchange
- ♦ **provide educational materials** for people at any level
of economic, political and civic understanding
- ♦ **promote practical methods** for positive
and constructive implementation.

We know that it is possible to live on this planet in ways that are

- ♦ **economically equitable** between rich and poor
so that everybody gains and wins
- ♦ **ecologically sustainable** for the resources of our earth
- ♦ **ethically justifiable** before our conscience
throughout our life time
- ♦ **morally acceptable** by future generations.

**The mechanism we advocate
is regulated money supply.**

**The medium we envisage is interest-
and debt-free money as a tool for exchange.**

Such financial tools for exchange could be supplied
at many levels:

- ♦ International, European, national, business
- ♦ local government, local citizens

Our Philosophy

On the brink of a new millennium, we owe it to future generations to combine the best of the human spirit and intelligence towards conscious efforts for change. We can shift our focus away from problems to emphasise solutions. Problems are inherited from the past while new opportunities can create turning points in history.

With the trend of globalisation and thanks to the Internet, efforts can now be made across national and other boundaries. International banking practices can be changed such that crashes due to phenomenal debts can be avoided.

Stabilising Globalisation – as a natural step after sustainable development – is our strategy for debt- and interest-free money – to move from unregulated capitalism to *Global Equalism*.

In this spirit, we have put together a *Programme of Activities, Access to Educational Resources and Campaigning Materials*:

Our Programme

Considering the increasing human and environmental crises, we see the year 2000 as a critical turning point. Hence the Campaign is working on certain key events as landmarks:

1. **Monetary Education**
 - **Public Meetings** at the Houses of Parliament and other venues in the country
2. **Political Campaigning**
 - **Democratic Potential for EURO** - Petition No. 1299/97 to the European Parliament to implement EURO with legislative parliamentary powers and the right for citizens to petition
 - **Debt-Free Money Supply** - a letter to MPs and MEPs for people in their own constituency about an alternative to money shortage and inflation
 - **Constituency membership** - an invitation to people to develop relationships with their politicians to discuss the issues in each of the 650 constituencies

3. Alliance Building

- **Third Sector Support** - a networking initiative among like-minded groups, individuals and organisations
- **Imagine Money Fairness** - a postcard campaign for everybody who wants to learn about the problems, participate in solutions and opportunities and express their vision of a world built on monetary fairness
- **Barter membership** - a real initiative to practice cash-free exchanges among businesses through commercial companies and community members through LETS or Time Credits

4. Monetary Research

- **Public Service Banking** - a questionnaire for banks and bankers to express their level of understanding of the problems and their commitment to change and new opportunities

Information and Resources

As a first information pack, we send you

Freedom from Usury - Time to Stop Lending Money at Interest
Critical and Interesting Essays on Globally Sustainable Capitalism
